The U.S. Census has announced that the 2010 Census Population Counts will be published beginning in February 2011. 2010-2030 projection numbers are estimated from cohort and decennial trends, with descending confidence at each decade beyond 2000.

Simple Trend Projection based upon the trends since 1970 of each age group independent of other factors.

Age Cohort Attrition Trend Projection follows each Age cohort as it progresses to the next decade, multiplied by the trend in average cohort attrition from one age group to the next, across each decade.
